Outsourced Front-end Developer
Vaskeappen | Drøbak, Norway
Nov 2021 - Aug 2022

Web Developer
Fourello | Philippines
Dec 2020 - Present

WORK PROJECTS

Medgate
Medgate is a teleconsultation mobile app that allows patients to talk to doctors regarding various illnesses as well as receive follow-up care and virtual prescription. I was assigned to create and maintain the public website, web portal, and CSR chats part of the system.

- Role: Full-stack Web Developer
- Technologies: PHP/Laravel, JavaScript/Vuejs, AWS

Inspire Church
Inspire App is designed to publish content and have the church members watch or listen to these contents. I was assigned to create and maintain the web portal part of the system.

- Role: Full-stack Web Developer
- Technologies: PHP/Laravel, JavaScript/Vuejs, AWS

ZWELL Philippines
ZWELL Philippine Realty Development Corp is a Philippine-based real-estate corporation. I was assigned to create and maintain ZWELL`s web portal.

- Role: Full-stack Web Developer
- Technologies: PHP/Laravel, JavaScript/Vuejs, AWS

Vaskeappen
A mobile app that connects customers to self-employed cleaners with just a few taps of their fingers. I was assigned to create and maintain the public website and web portal part of the system.

- Role: Front-end Developer
- Technologies: JavaScript/Vuejs, AWS
